Spanish (Native) · English (Professional Working Proficiency – B2)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 6+ years of experience building enterprise SaaS applications for globally distributed teams across the United States and India. Specialized in Angular, C#/.NET, and cloud-native architectures on Azure and AWS.

Proven track record of leading enterprise modernization initiatives, reducing application response times from approximately 10 seconds to 1 second through SQL optimization, implementing AI-assisted engineering with Model Context Protocol (MCP) and Amazon Bedrock, and driving engineering excellence through architecture standards, code quality, and technical mentoring.

PROFESSIONAL EXPERIENCE

Software Engineer — NICE CXone *August 2025 – Present*

Hybrid · Cochabamba, Bolivia

- Migrated the Studio microfrontend from PrimeNG to Angular Material, standardizing the design system across more than 200 components and eliminating UI inconsistencies throughout five application modules.
- Upgraded the Studio microfrontend from Angular 17 to Angular 21, managing dependency upgrades, resolving breaking changes, and delivering the migration with zero production incidents.
- Implemented WCAG 2.2 AA accessibility standards using ARIA roles, keyboard navigation, focus management, and automated/manual accessibility audits.
- Designed and implemented an MCP server exposing the internal component library documentation to Claude through Amazon Bedrock, enabling AI-assisted engineering workflows.
- Developed custom AI Skills and AI Agents for pull request reviews, Jira ticket analysis, and unit test generation, significantly increasing engineering productivity across the team.
- Delivered end-to-end Full Stack features while collaborating daily in English with Product Managers, UX designers, architects, QA engineers, and software engineers distributed across the United States and India.

Software Engineering Lab Assistant — Universidad Mayor de San Simón *June 2024 – December 2024*

Part-time · Cochabamba, Bolivia

- Served as Frontend Technical Lead for a university software project, leading a team of more than five developers by defining architecture, assigning tasks, conducting code reviews, and providing technical mentoring.
- Established engineering standards by introducing Git branching strategies, Git Flow, and pull request review practices adopted across the laboratory.
- Designed and delivered C# and .NET workshops for university students and external professionals with different experience levels.
- Maintained and enhanced production systems while collaborating directly with university stakeholders.

Software Engineer — Spartan Soft (ISAPCAT) *July 2023 – July 2025*

On-site · Cochabamba, Bolivia

- Reduced the sales reporting module response time from approximately 10 seconds to 1 second by optimizing SQL queries, indexing strategies, and execution plans over databases containing hundreds of thousands of records.
- Designed and deployed cloud-native applications using Azure App Services, AWS, Docker, Kubernetes, Helm, and automated CI/CD pipelines.
- Built Full Stack enterprise solutions using Angular, .NET Core, and Spring Boot following Microservices, Clean Architecture, Domain-Driven Design (DDD), and CQRS principles.
- Integrated Redis for caching and Kafka for asynchronous communication between microservices.
- Designed and implemented a test automation strategy from scratch, developing more than 200 automated UI and API tests using Playwright and pytest across two enterprise applications.
- Implemented a centralized automation platform using Jenkins, Docker, Kubernetes, and ReportPortal, enabling automated execution and centralized reporting across multiple projects.
- Collaborated closely with Product Owners throughout feature refinement, technical design, and implementation.

Software Engineering Intern — NICE CXone *November 2022 – July 2023*

Remote

- Remediated critical, high, and medium security vulnerabilities identified by Black Duck SCA and Veracode SAST by applying OWASP ESAPI secure coding practices.
- Designed and maintained CI/CD pipelines for microservices and microfrontends using Jenkins and Docker.
- Diagnosed and resolved production incidents during cloud migration initiatives using AWS CloudWatch.
- Collaborated daily in English with architects based in India and Senior Engineers and Technical Leads across the United States.

Freelance Full Stack Developer — Independent Consultant *August 2021 – October 2022*

Remote

- Built end-to-end Full Stack solutions by managing software architecture, development, testing, and cloud deployments on Azure and AWS.
- Gathered business requirements and translated them into scalable technical solutions while working directly with clients.
- Managed the complete software development lifecycle, maintaining continuous communication with stakeholders throughout project delivery.

Full Stack Developer — JabuSoft *August 2019 – June 2021*

On-site · Cochabamba, Bolivia

- Developed multiple SaaS applications from the ground up for healthcare, sales, inventory management, and restaurant businesses using Angular, .NET, and SQL Server.
- Implemented JWT authentication, role-based authorization, and automated unit/integration testing to improve application reliability.
- Maintained production applications, resolved software defects, and onboarded new developers into the engineering team.

TECHNICAL SKILLS

Programming Languages: C# · TypeScript · JavaScript · Java · SQL

Frontend: Angular (v8–21) · React · Angular Material · PrimeNG · RxJS · NgRx · Signals · Standalone Components · Lazy Loading · OnPush

Backend: .NET Core · ASP.NET Core · Spring Boot · Node.js · NestJS · REST APIs · Entity Framework Core · Minimal APIs · LINQ · JWT Authentication · Dependency Injection · Repository Pattern

Cloud & DevOps: Azure App Services · Azure Storage · AWS (EC2, S3, Lambda, CloudWatch, IAM, RDS, Bedrock) · Docker · Kubernetes · Helm · Jenkins · GitHub Actions · Azure DevOps · CI/CD

AI Engineering: Model Context Protocol (MCP) · Claude via Amazon Bedrock · AI Agents · Custom Engineering Skills · Prompt Engineering · AI-assisted Software Development

Software Architecture: Microservices · Microfrontends (Module Federation) · Nx Monorepo · Clean Architecture · Domain-Driven Design (DDD) · CQRS · Event-Driven Architecture · Serverless · Kafka · Redis

Quality Engineering: Playwright · pytest · xUnit · JUnit · API Testing · End-to-End Testing · Veracode · Black Duck

Databases: SQL Server · PostgreSQL · MySQL · Query Optimization · Indexing · Execution Plan Analysis

Accessibility: WCAG 2.2 AA · ARIA · Keyboard Navigation · Focus Management · Accessibility Auditing

EDUCATION

Bachelor of Science in Systems Engineering · Universidad Mayor de San Simón 2023

Graduate Diploma in Software Quality Engineering · Universidad Mayor de San Simón 2024

Focus: Python/pytest automation frameworks, QA processes, Docker, and Kubernetes infrastructure

Full Stack Web Development Bootcamp · Enyoi 2024

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02) · In Progress Scheduled for 2026

AWS Certified AI Practitioner (AIF-C01) · In Progress Scheduled for 2026
